SNP131 series

SNP131, the pinnacle of license plate recognition technology.
Engineered with precision and cutting-edge AI, this advanced system delivers unparalleled accuracy and speed in identifying and capturing vehicle license plates.

LICENSE PLATE RECOGNITION

SUPERIOR ACCURACY

Boasting industry-leading accuracy rates, the SNP131 can reliably recognize license plates in various lighting conditions and angles.

REAL-TIME PROCESSING

With its powerful processing capabilities, the SNP131 can capture and process license plates in real time.

ROBUST HARDWARE

Built to withstand harsh environments, the SNP131 features durable construction and weatherproofing to ensure reliable performance in outdoor settings.

VERSATILITY

The SNP131 is designed to be adaptable to various environments and use cases from security surveillance to parking access control.
