

SE-VMS

Visitor Management System

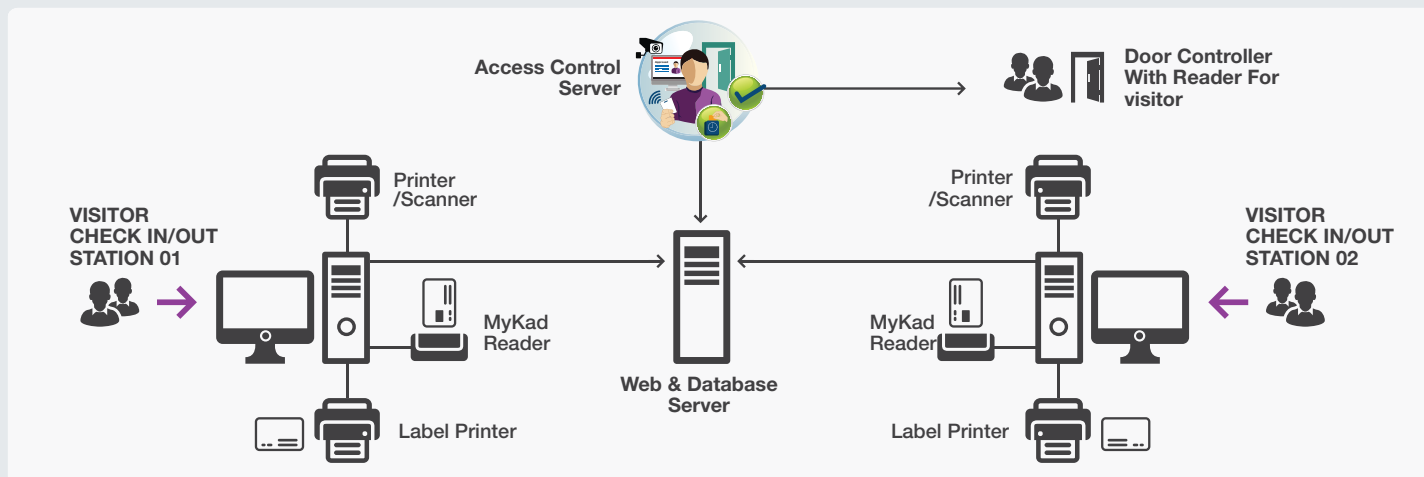

Entrance is first level of protection against bad visitors. By filtering out all the “bad people” and only allow all the “good people” to go in, you effectively reduce potential security threats.

SoyalEtegra Visitor Management software (SE-VMS) help you to verify, monitor, automate and improve visitor recording process with extensive secured reporting for future audit.

BENEFITS

- ✔ Extra visitor info from MyKad or scan printed info on driving license to ensure all information is captured accurately up to digital precision.
- ✔ Minimum typing to ensure fast speed visitor check-in and check-out. Personnel with very less IT knowledge will be able to use the system with minimum training.
- ✔ Maintain black list to quickly identify visitor that have bad history record
- ✔ Support fast auto check-out when visitor drop their card into SOYAL reader inside dropbox.
- ✔ Allow employee to pre-registers visitor ahead of time to further expedite check-in.
- ✔ When used together with SoyalEtegra SE-ACS, you can assign door access and lift access permission to visitor. You can also capture pictures of visitor when they check-in and check-out as visual evidence for future audit purpose.
- ✔ During emergency, SE-VMS will show number of visitors that are still in the building. Integration with SE-ACS will also show visitors last known door. This helps facilitate efficient evacuation.
