MAG Nicas
Hybrid Cloud Access Control

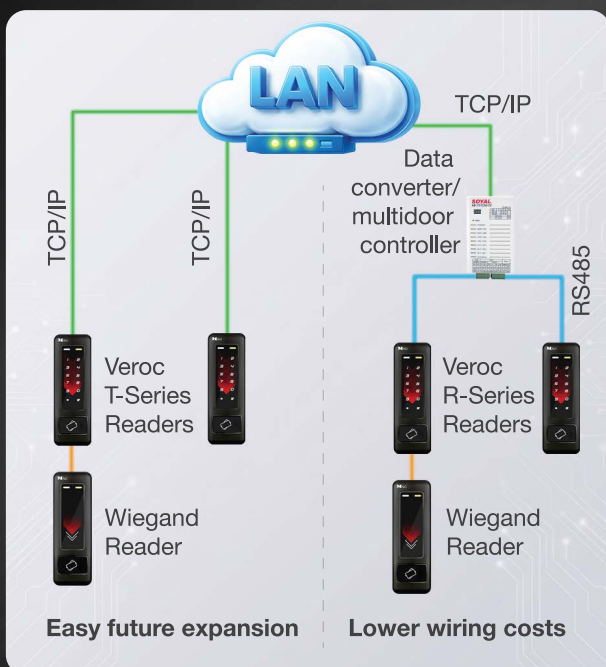

Stylish, Secure and Robust

DESFire custom key encryption prevents card cloning for higher security.

IP56 slim design to deliver a more reliable performance for indoor and outdoor even in demanding environment while still staying modern minimalist.

Easy to fit into your budget

Affordable RS485 readers further lower the wiring cost with our multi door controller looping architecture. Advanced Direct TCP/IP readers allow you to add reader at any nearest network point to maximise scalability.

Manage anywhere

Enjoy the convenience to manage your access security from your mobile phone over the cloud with MagNicas.

Increase productivity

4 types of time attendance shift to cater different job roles. Flexible reporting filters help you track late in, early out, work time, over time and holiday more efficiently.

Impress your visitor

Seamlessly fast experience using pre-registered QR code check in and out via receptionist or dedicated self service console.
