ADVANCED CONTROL WITH ON-PREMISE RELIABILITY

Award-winning MagEtegra keeps your building security operational without relying on the internet, allowing door-open-too-long and forced-open events to appear instantly on the E-map with real-time alerts and detailed access records.

▲ CCTV integration for live view to verify false door alarm and quickly find playback by door location.

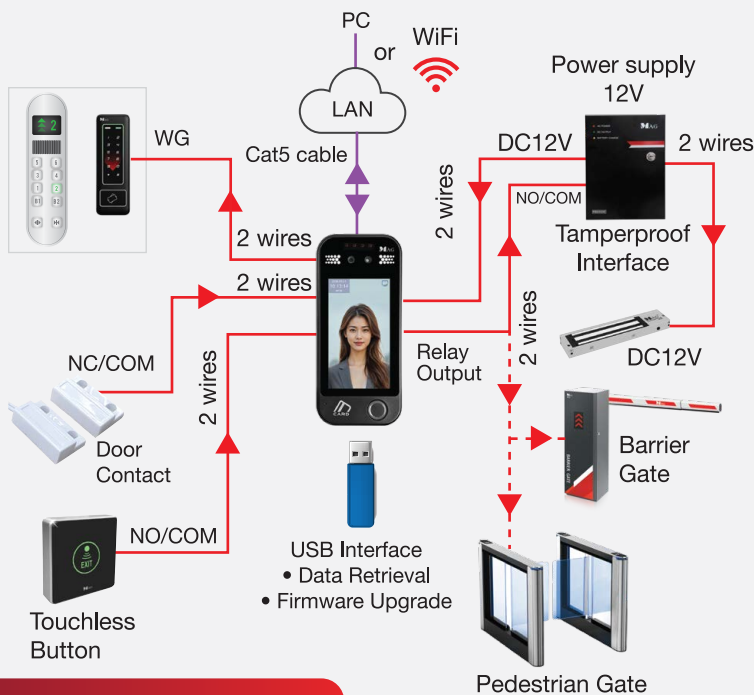

▲ Use webcam to capture face for user enrolment.

AUTONOMOUS VISITOR ACCESS

Pre-approved visitors scan their QR code on the face reader for direct access. Contractors and vendors can check in at reception before receiving their QR code, reducing lobby queues while creating a smoother, more controlled visitor experience.
